

FILLET FOR CHEFS

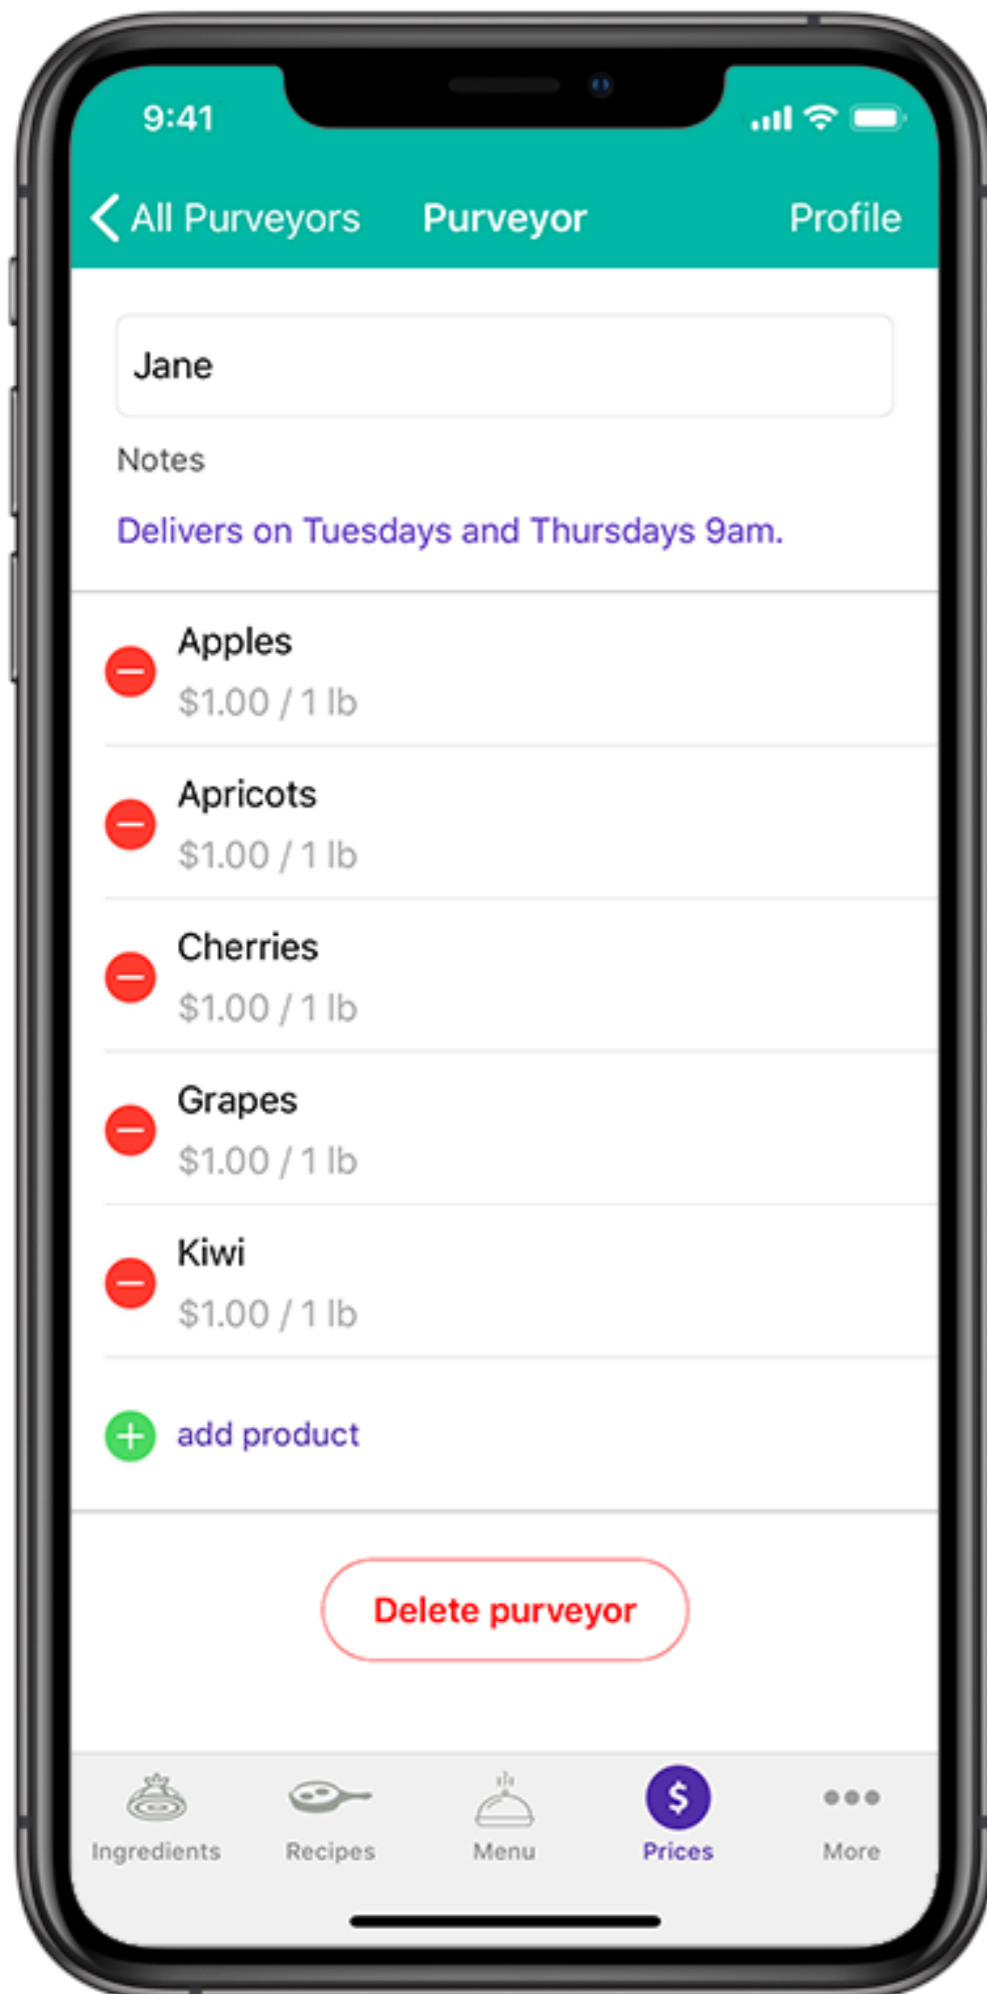

Guide to
ORDERS

Using Orders is simple

- ✓ Create your Order.
- ✓ Fillet sends your Order.
- ✓ Supplier receives your Order.
- ✓ Receive notifications.

OVERVIEW

-  **Create your Order** inside our iOS app.
 - Set **locations** for delivery.
 - Add **notes** to your supplier.
-  **Fillet sends your Order** to your supplier.
-  **Supplier receives your Order,**
 - Views order details, and
 - Confirms** or **declines** your Order.
-  **Receive notifications** about your Order when your supplier confirms or declines your Order.

PURVEYORS

 Your suppliers are saved as "**Purveyors**".

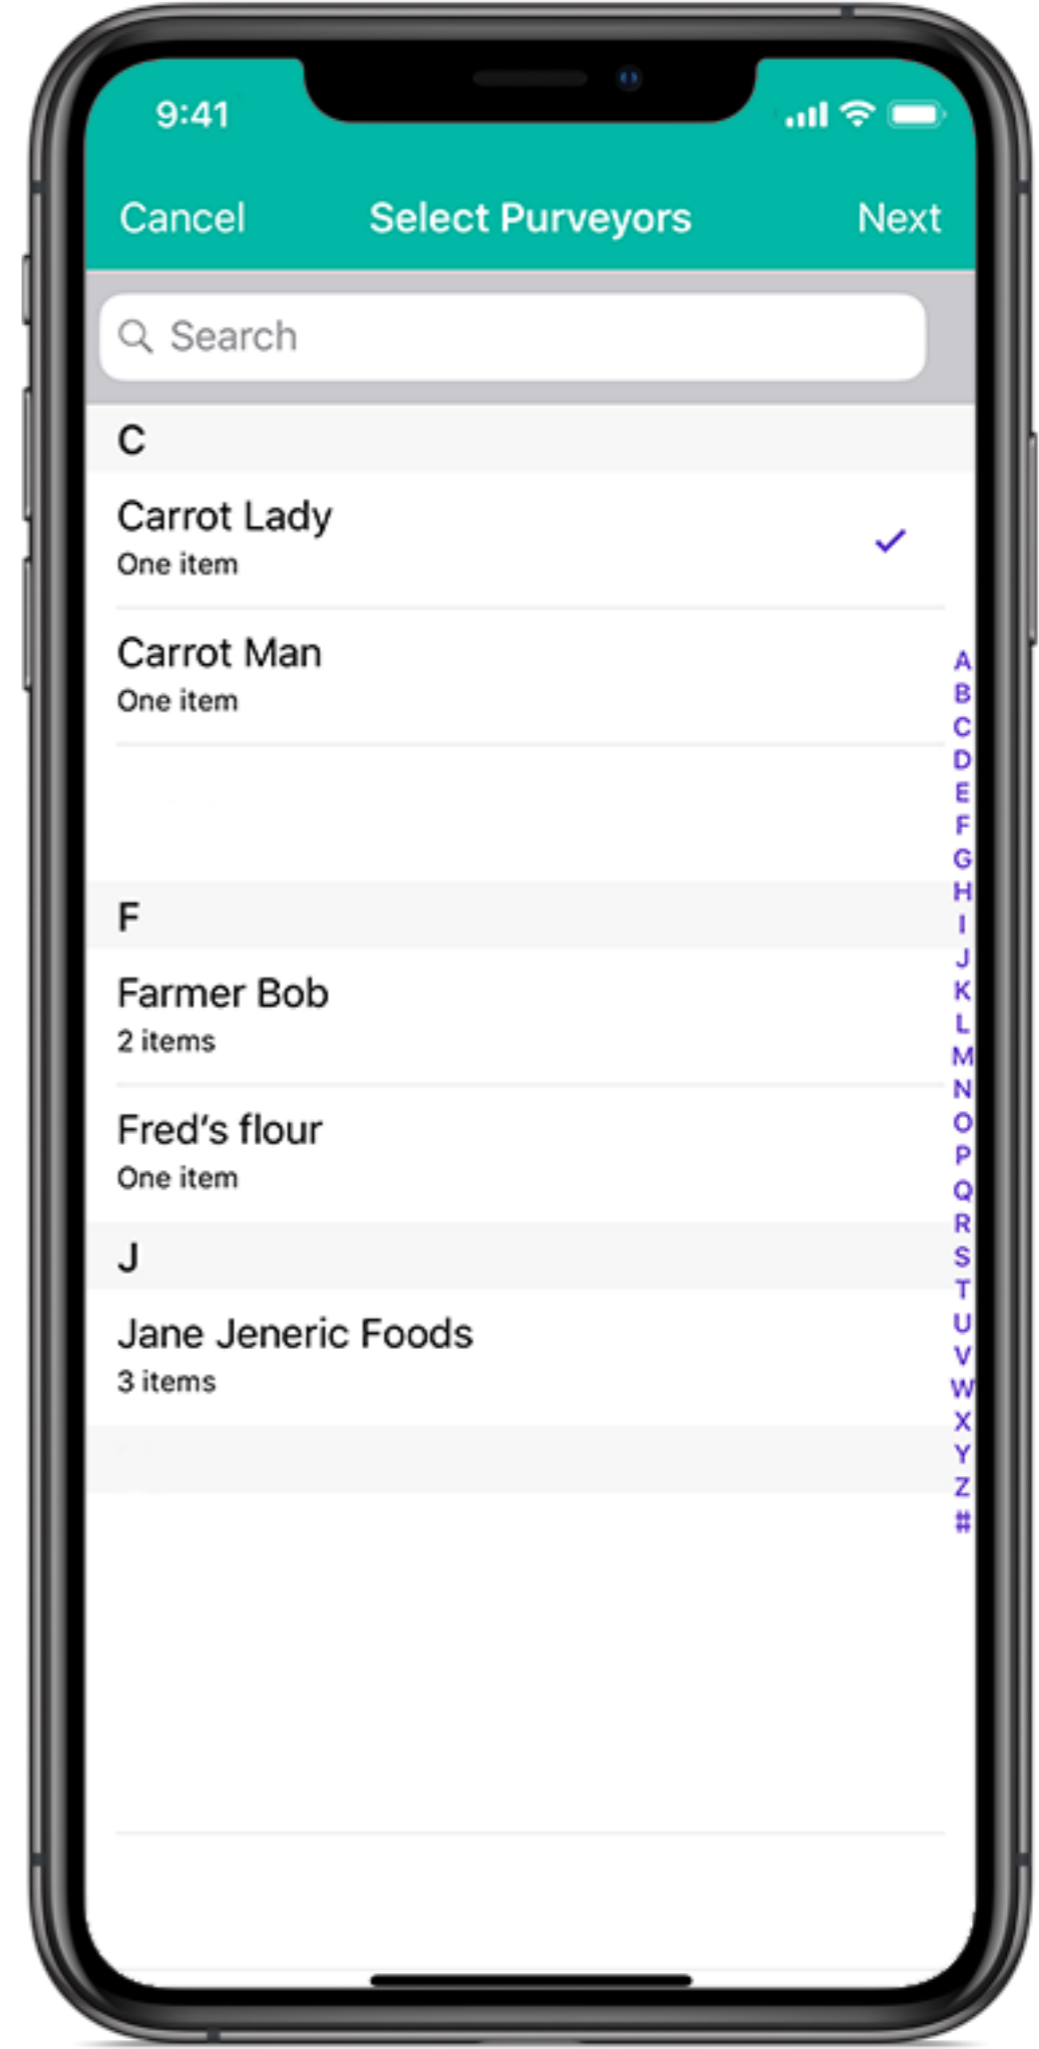

Record **prices** and **products** sold by different Purveyors.

 **Save Purveyors' contact information** for faster future Orders.

 **Add notes for specific Purveyors.**

Useful for quick reminders.

e.g. **Supplier** makes deliveries on Mondays at 9am.

PRICES

- 📌 Save **different prices** for an ingredient from **different Purveyors.**

e.g. Apples:
Supplier #1 = \$1.00/kg
Supplier #2 = \$2.00/kg

- 📌 Save **multiple prices** for an ingredient from the **same Purveyor.**

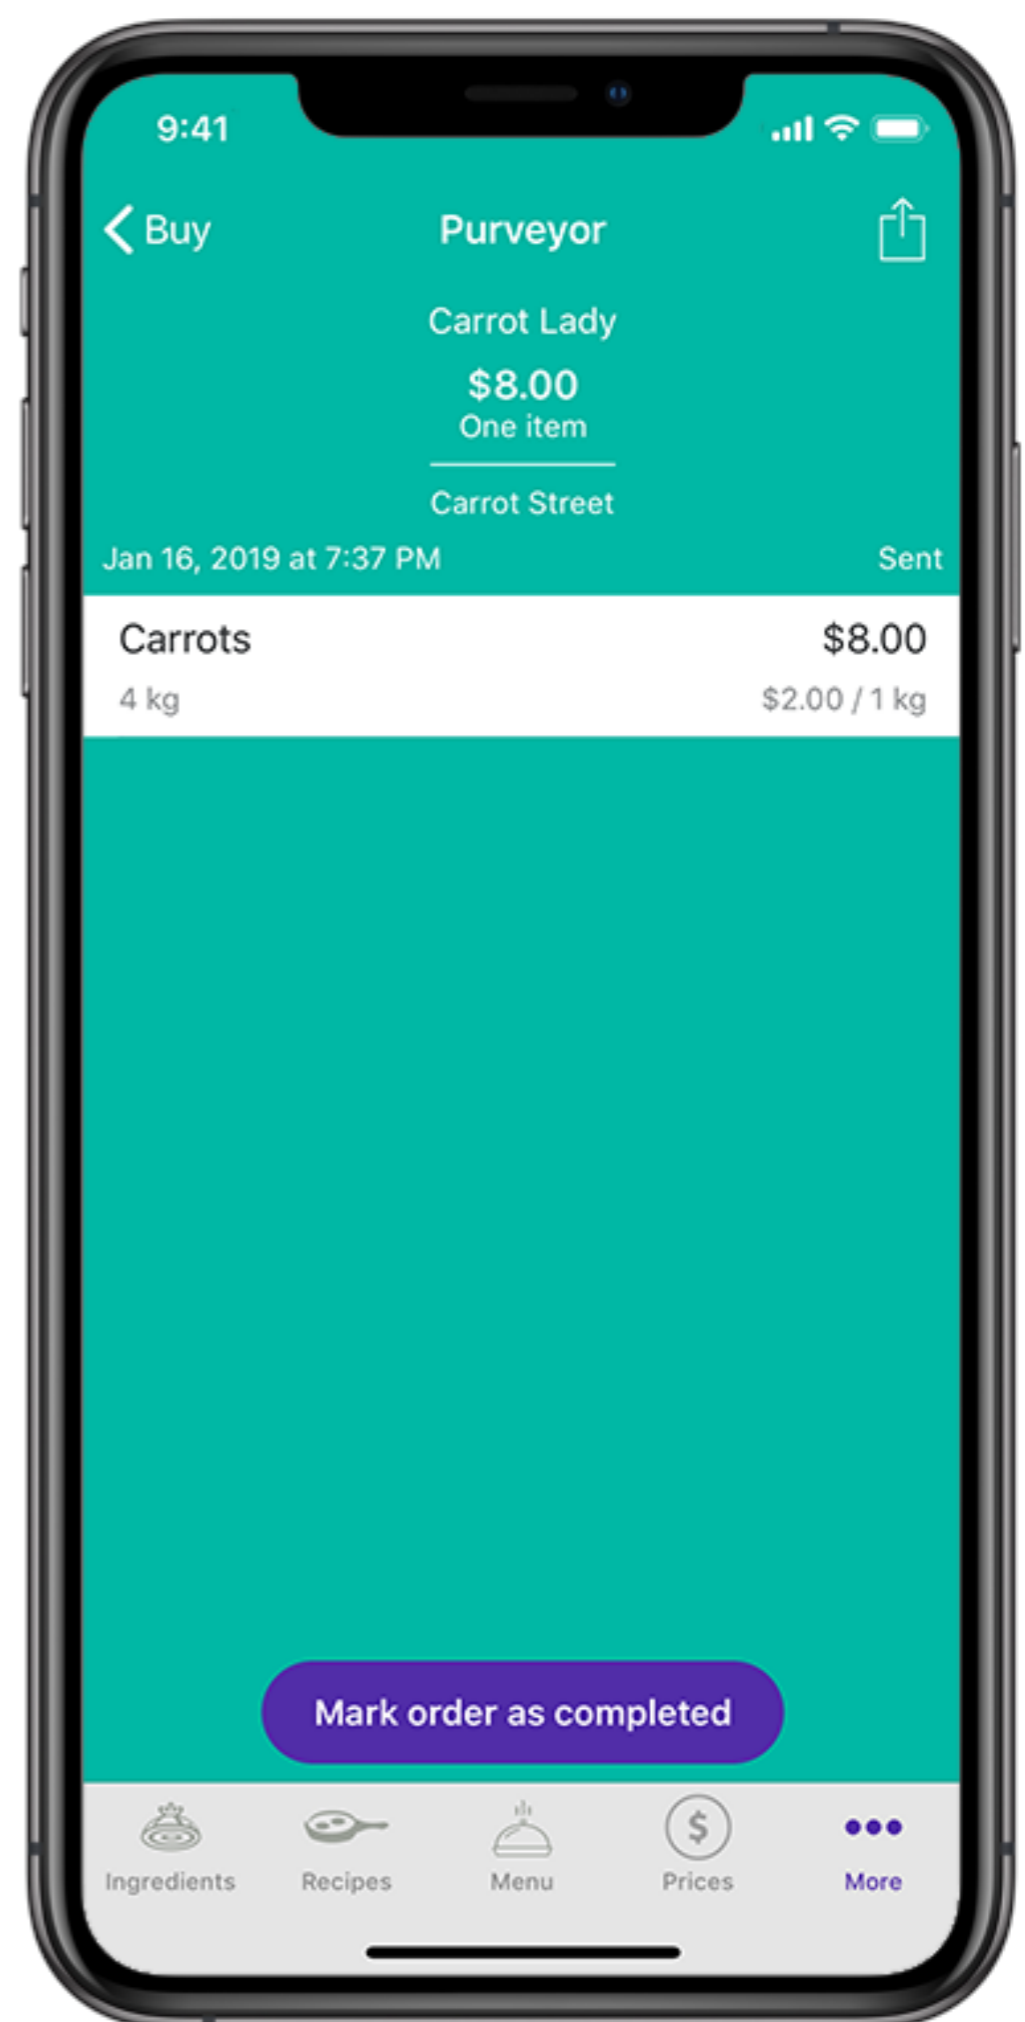

e.g. Apples:
Supplier #1 = \$1.00/kg
Supplier #1 = \$0.50/kg (sale)

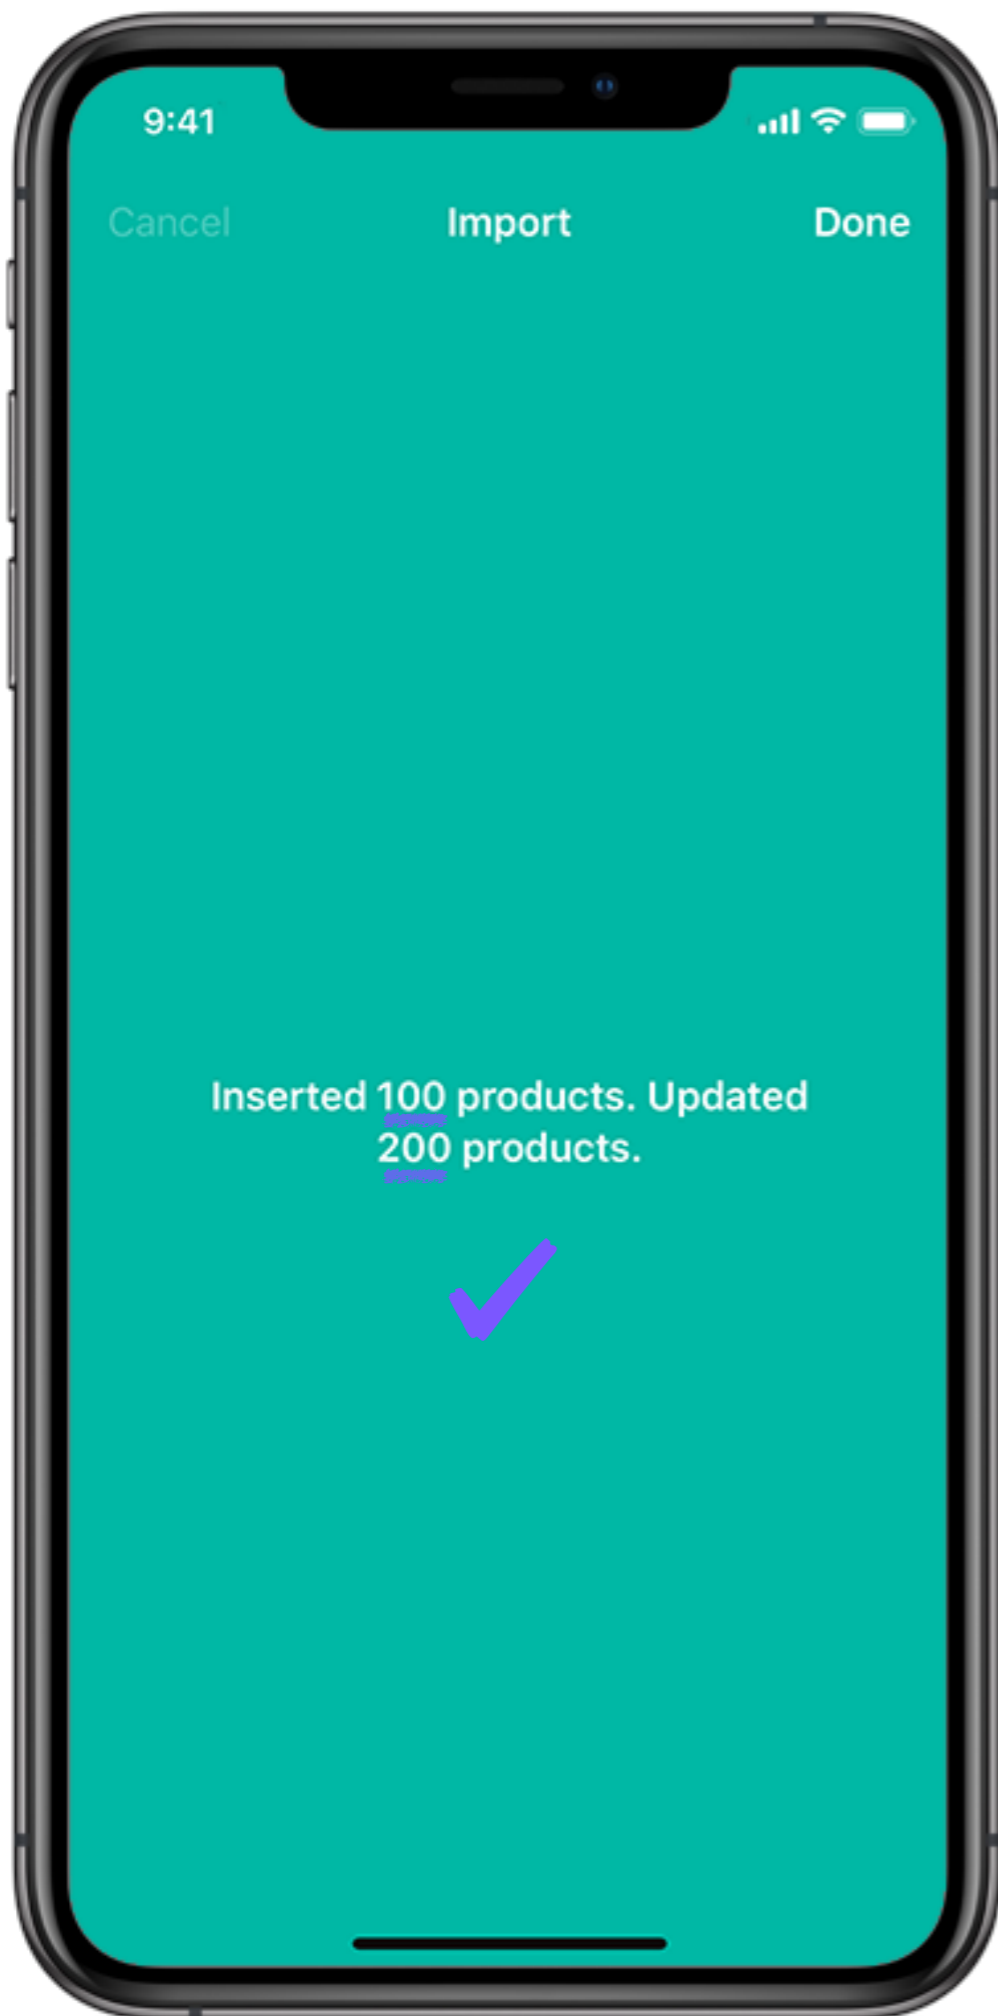

- ☑ Useful for recording **special prices** like volume discounts, seasonal sales, and more.

APP INTEGRATION

Orders integrates with other Fillet features like **recipe costing** and **Inventory**.

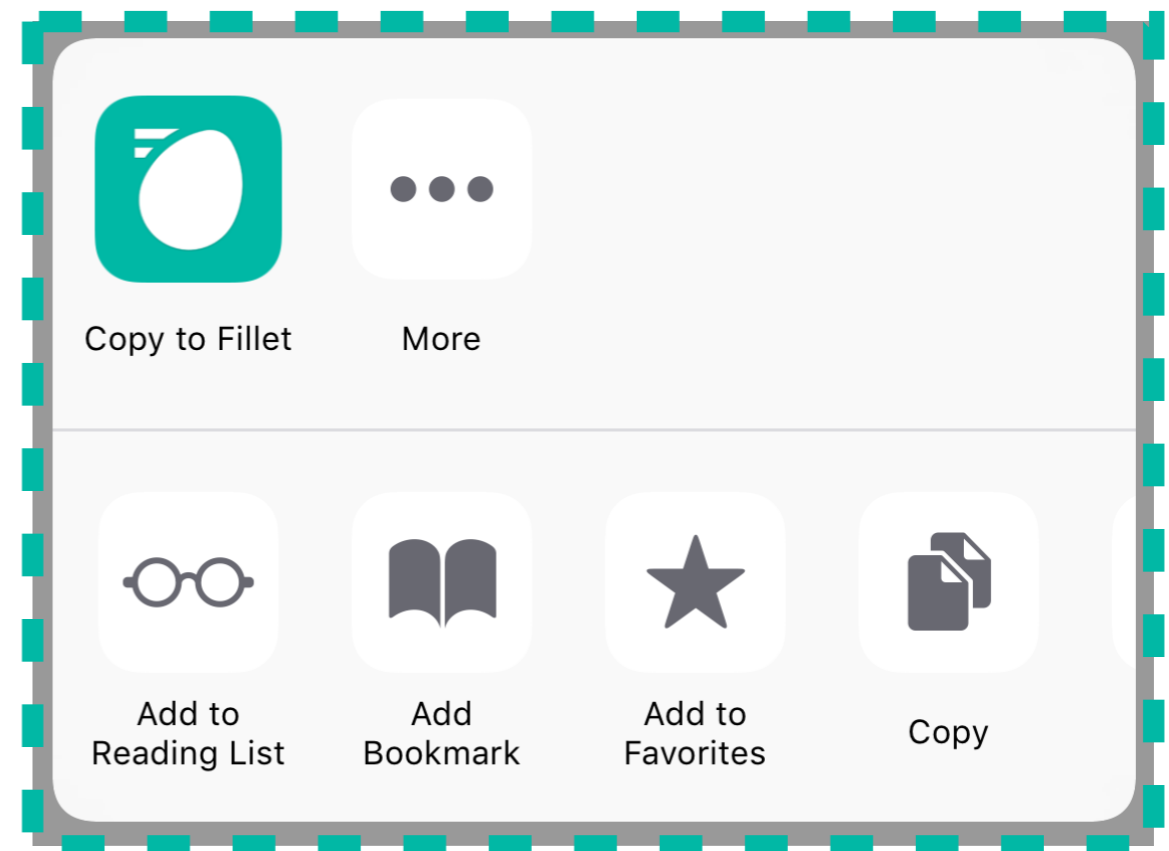

-  **Create orders** based on your Fillet **ingredients** and **recipes**.
-  **Calculate costs** of using an ingredient in a recipe.
- Compare **different prices** from different **Purveyors**.
- Choose a **Purveyor** and place an **Order**.

DATA IMPORT

-  Import **large amounts of data** using Fillet's import spreadsheet.
- Import key details like **ingredients, amounts, prices, units, and recipes.**
- Update **product lists and prices.**
